Only
45%

plastic recycling
rate in 2020.

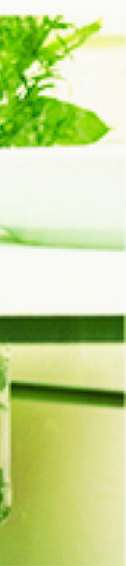

Huge amounts of
plastic waste

Insufficient recycling

seemingly unstoppable
Over-consumption

and limited access to
new approaches of
consumer behavior.

**Reduce
Refuse
Reuse**

Let's change our understanding of waste together and create new aesthetics with recycled, reused, and discarded materials.

FIND SOLUTIONS THROUGH

creative waste experimentation

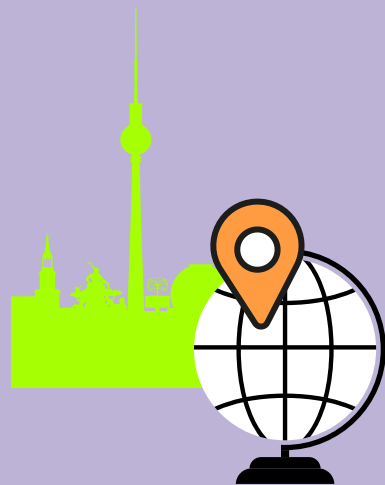

Our approach is experiential learning to create collective knowledge around up-cycling, refurbishing, and sustainability through making and the lenses of recycled and reused materials.

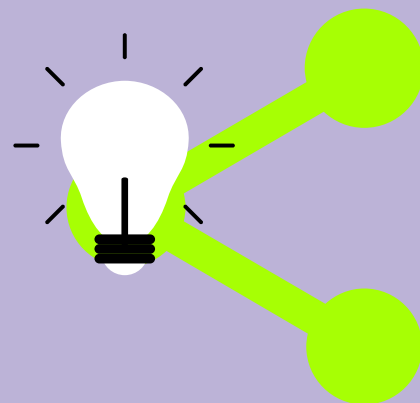

shaping zero waste
by making

Built on 5 pillars

Localism

We think about local solutions to global waste problems.

Grassroots Learning

Sharing knowledge of circular shifting in local communities through experimental workshops.

Power to the people

Empowering upcycling methods to transform plastic and glass packaging waste into new aesthetic interior design to learn together about waste and sustainable lifestyle.

Health giving product experiences.

well-being interiors offer a combination of mental and physical comfort, ideally helping to calm the mind, allow for renewed focus and concentration, while also embracing the occupant with the vitality of nature.

Strong like a girl!

Gender is not a limiting factor in daring to make it big. We provide safe spaces where women and girls can learn how to use power tools in a friendly environment.

We support the Sustainable Development Goals (SDGs)

Our Workshops

UPCYCLING FURNITURE

\$40

10 participants

GREEN PANEL

\$90

Plants and waste. Mother Earth is the best recycler, in this workshop we will learn about her while you build a green panel for your home.

10 participants

FREESTYLE UPCYCLING

\$50

Here we will think by doing. We will question the concept of waste. The idea is to enable a space for free experimentation.

8 participants

Up-cycling furniture

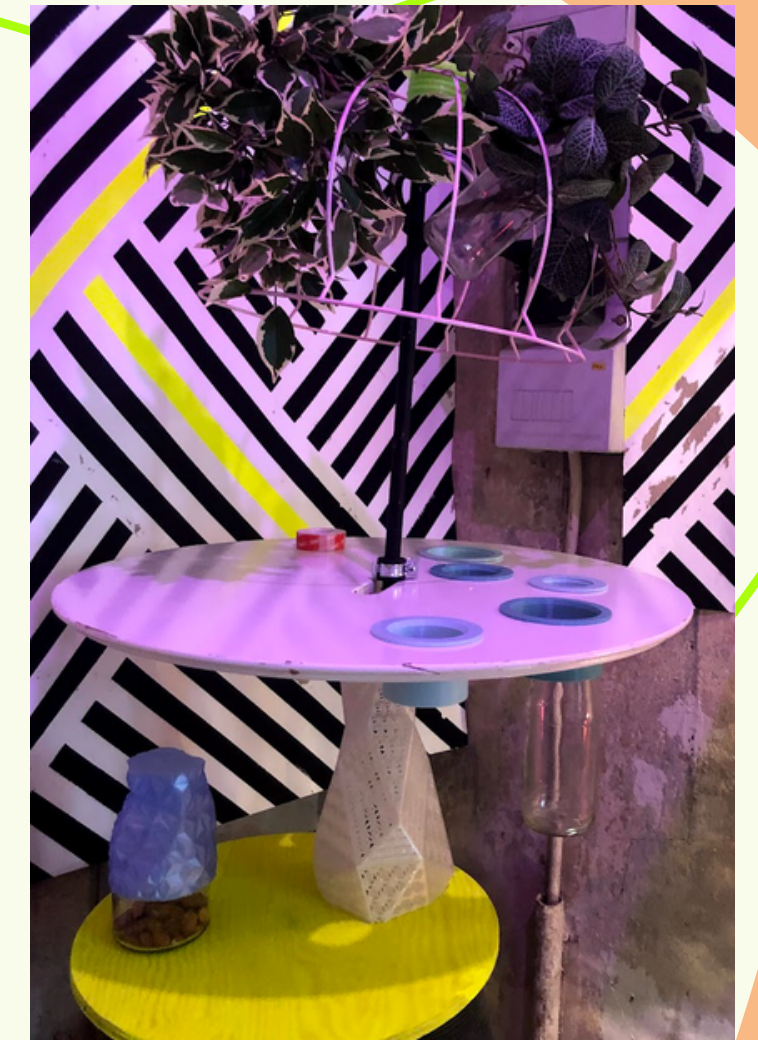

Take part in a 3 hours workshop where you can give a new dimension to an old piece of furniture and learn basics about resource-driven design and waste management.

Green panel

Take part in a 4 hours workshop where you can create a hanging plant shelves system from discarded wood sheets, jars, and glass adapters. Learning about the basics of hydroponic and resource-driven design.

Freestyle upcycling

Take part in a 3 hours workshop
to play with the power of creativity
and sustainable components of the
up-cycling method of Qubitkidz.

Recharging room

An immersive experience where we rethink waste. We will build together a restorative space for the community.

Thanks for taking a look around!

Do you want to take part of this waste revolution?!
